ADVANTAGES OF VIDEOCONFERENCING

- Meet face-to-face without leaving your office.
- Time is money. Videoconferencing allows you to save on travel expenses, as well as time lost traveling.
- Multiple locations can participate on the same videoconference call. Up to 5 locations (with any number of individuals per location) can participate in a single videoconference.
- You can easily share documents, make presentations and develop documents quickly.

The firm is excited to introduce our new videoconferencing capabilities.

This new facility allows our lawyers to meet the needs of our clients who cannot meet in person, but who want the face-to-face experience. Our dedicated facility and equipment ensures that videoconferences provide our clients the best experience possible.

We are able to connect using Skype or other videoconference providers, such as WebEx, used by clients. Videoconferencing allows individuals and groups to meet long-distance, while saving time and money. We invite you to set up a free demonstration of our new technology. If you would like to try out videoconferencing, please contact Meichell Walsh at (303) 339-5832.
